

## ISO 22000 Certificate for CRNAGORACOOP

Quality Austria issued an ISO 22000 certificate to the first company - CRNAGORACOOP - in Montenegro. CRNAGORACOOP produces milk coffee, cookies and chocolate products. The organization has won different medals and prizes. Innovation and the goal to being best are driving forces in the organization. Export plays a very important role and the certification according to ISO 22000 has seemed to be the next logic step.

According to the corporate policy food safety management plays a very important role in protection of life and health. The world-wide developed standards and norms for food safety management related to all components of the food supply chain, including foodstuffs producers and gain importance with farmers.

### **Motivation and benefits**

Failures in food supply and their adverse impacts on food safety may lead to illnesses threatening to life. In addition, the losses caused by spoiled foodstuffs and faulty storage reach unimaginable dimensions.

Therefore, the ISO Standard EN ISO 22000 "Food Safety Management System Standard" specifies the requirements food safety management systems (FSMS) must meet in order to consistently provide safe end products for the consumer and increase customer satisfaction

ISO 22000 is the standard for all organizations active throughout the food chain, which is harmonized worldwide. ISO 22000 can be applied by all organizations in the food chain, including feed producers and agriculture, worldwide. ISO 22000 combines recognized key elements of food safety, such as interactive communication, system management, process control and HACCP principles, with the so-called "prerequisite programmes" (PRPs).

Communication along the food chain is essential to ensure that all relevant food safety hazards are identified and adequately controlled at each step within the food chain. Designated personnel shall have defined responsibility and authority to communicate externally any information concerning food safety.

The ISO 22000 Certificate stands for

- Food safety
- Product Quality
- Enhances consumer protection and confidence

and confidence is in volatile markets very important. There is no lost and found office for lost confidence.
