

Festive presentation of the first „Golden Certificate”

As recognition of its commitment to Quality Management and its quality performance the Managing Director of MSZT has given a **“Golden Certificate”** to TVT Vagyonvédelmi ZRt. (former TÜVATI Vagyonvédelmi Rt.).

This company was the first among the property protecting companies in Hungary that implemented its Quality Management System 12 years ago and made it certified by a third party, the Hungarian Standards Institution (MSZT).

The field of application of its Quality Management System is as follows:

“Design, installation, repair and maintenance of intruder alarm, fire alarm, CCTV, access control and other low voltage systems”.

The first certificate was granted to them in 1996 with only a few non-conformities owing to their well organised work, well-trained employees, well-selected suppliers and well-documented processes.

In course of the certification procedures the top management demonstrated its commitment to quality and quality management system and required it from the employees as well.

Customer satisfaction, meeting the legal and standard requirements and profitability are the most important factors for the company.

There is hardly any fluctuation, 40 employees from total 56 work for TVT Vagyonvédelmi ZRt. For more than 10 years. The internal trainings such as continuous extension trainings related to the profession and quality management are the basis of the profitable work, the good quality and the establishment as well as the maintenance of quality awareness. The rate of employees who have university/college degree is high.

According to the top management – and it is also proved by their market position – the application of the quality management system contributed to their continual improvement to a great extent.

In course of obtaining the fifth certificate a great commitment to quality was their main characteristic and besides profitable operation the fulfilment of customer expectations was of greatest importance.

Therefore, the Managing Director of the Secretariat for Certification MSZT has awarded a “Golden Certificate” to the company.

Mr. István Kapuvári (left) Deputy Head of MSZT Secretariat for Certification hands over the “Golden Certificate” to Mr. Lajos Móró, General Director of TVT
